## **GETEC and Viessmann repositioning collaboration for sustainability**

- **Optimally coordinated supply concepts**
- **Customers receive affordable efficiency and climate protection solutions**

**Magdeburg / Allendorf (Eder), 22.02.21** – GETEC and Viessmann intend to further strengthen their already excellent cooperation in the energy services market for heating, cooling and solutions in the context of sector coupling. This development was announced by both companies today. To achieve this goal, both partners are creating optimised processes, which will make it possible to develop and implement projects faster and more successfully. In addition to the purchasing process, this will also apply to the creation of concepts and quotation preparation as well as the use of digital solutions for system operation. This applies in particular to the areas of integrated neighbourhood solutions, combined heat and power, photovoltaics, fuel cells and heat pumps.

"GETEC and Viessmann are leaders in their respective core segments of contracting and systems engineering. We are therefore very pleased about the increased cooperation. The aim is to offer end customers a holistic, comprehensive supply concept that is optimally tailored to their needs at the earliest possible stage of the project. GETEC will convert this into a long-term energy supply contracting agreement and thus also significantly reduce the carbon footprint of our customers," says Michael Lowak, CEO Real Estate Segment at GETEC Group.

"With this cooperation, we are addressing the growing demand for affordable efficiency and climate protection solutions. This will allow us to expand our current business relationships and align our product portfolio even more specifically with customer requirements," says Dr. Frank Voßloh, Managing Director Viessmann Germany.

### **About GETEC**

GETEC is the leading partner for real estate and industry for smart, efficient and green energy solutions - in Germany and beyond. Our promise "We have the energy for more" is the guiding principle for around 1,500 employees who use excellent engineering know-how, outstanding regulatory expertise, great speed of action and proven sustainability expertise to navigate our customers through an increasingly complex energy world while consistently reducing their carbon footprint. GETEC is active in eleven countries and generated sales of around 700 million euros in 2019.

### **About Viessmann**

Viessmann is the leading provider of climate solutions for all living spaces. The 'Integrated Viessmann Solutions Offering' enables users to connect products and systems seamlessly via digital platforms and services for climate (heating, cooling, air quality) and refrigeration solutions. All solutions are based on renewable energy and maximum efficiency. All activities of the family company, founded in 1917, are based on its purpose. "We create living spaces for generations to come" – that is the responsibility of the global Viessmann family with 12,300 members.
